EXPERIENCE

PHOENIX CYBERSECURITY
Cyber Security Engineer
Oct 2020 - Present | Memphis, TN
- Created custom front end interfaces to allow analysts to better understand incident data
- Implemented various automation pipelines for different security tasks
- Developed internal tools for various use cases using Node.js, React, and MongoDB

SYNACK RED TEAM
Researcher
Jul 2020 - Present | Memphis, TN
- Reported findings of security assessments that included any security concerns and ways that these concerns could be mitigated
- Performed manual security assessments of clients web applications
- Ran automated vulnerability tests against targets assets

METHODIST LE BONHEUR HEALTHCARE
Information Security Analyst
Dec 2018 - Oct 2020 | Memphis, TN
- Developed a new front-end for the SIEM (security information and event management) platform using Node.js, Vue.js, and Mongodb
- Developed scripts to automate common tasks for fellow members of the security operations team using Python and Bash
- Member of the core incident response team
- Managed endpoint security software
- Deployed and managed Privileged Access Management software
- Verified vulnerability data received from vulnerability scanners
- Assisted in remediation of vulnerabilities found in the organization
